Cleans up to  
1,740 sq ft

## An Important Note

We believe that clean air is a right and it should be available to everyone. While we've done our best to keep our rental prices low, we recognize they might still create a financial barrier for some groups. If this is the case for you, please contact us in confidence at [info@volunteeralberta.ab.ca](mailto:info@volunteeralberta.ab.ca) and we'll find a solution together.

## Why Clean Air Share?

Volunteer Alberta works to nourish the conditions for civic engagement and volunteerism in the province. One of those conditions -- we believe -- is that people feel safe to become involved in their communities in ways that are meaningful for them. We're actively experimenting and testing out new ideas -- like Clean Air Share -- to see if they help accomplish that.

Inspired by the example set by groups like [Clean Air Club](#), we believe that helping to address health inequities caused by poor air quality due to forest fires, pollution, and airborne illnesses is one of the best ways we can help protect the health and safety of everyone in our communities. It's also a tangible way we can [act in solidarity](#) with the disability rights community. Thanks for your interest in Clean Air Share!

## Also Consider a DIY Air Filter

If you're interested in creating a longer-term clean air solution for your organization but can't afford to purchase an air filter like the ones through this rental program, you might wish to consider building your own!

[The Clean Air Crew](#) has a great "how to" guide for building your own affordable air filter, known as a Corsi-Rosenthal box.
